Water Conservation Tips:

- ☐ Check household faucets for leaks. A faucet with even a slow drip takes 10- 25 gallons of water. 15 drips per minute add up to almost 3 gallons of water wasted per day.
- ☐ Keep showers to 5 minutes or less in length. A five-minute shower takes 10- 25 gallons.
- ☐ Keep a pitcher of water in the refrigerator. You won't have to run tap water to cool it.
- ☐ Use a broom to sweep your driveway, garage, or sidewalk instead of using water.
- ☐ Use a bucket of water to wash your bike or the family car and rinse quickly with a hose.
- ☐ Water your lawn in the evening or in the early morning to avoid evaporation. Be careful to water only the lawn and not the sidewalk or street, and do not over-water.
- ☐ Use water only when you need it. Don't leave water running; be sure to turn it off when you are finished.
- ☐ Condition the soil with mulch or compost before planting grass or flowerbeds so that water will soak in rather than run off.
- ☐ Fertilize lawns at least twice a year for root stimulation, but do not over-fertilize.
- ☐ Use drip irrigation systems for bedded plants, trees, shrubs, or turn soaker hoses upside down so the holes are on the bottom. This will help avoid evaporation.
- ☐ Don't forget to check outdoor faucets, sprinklers and hoses for leaks.
